L-DCS - Local Departure Control System

IATA / CUPPS compliant

Features

- graphical management of cabin plans;
- integration of IATA messages - PNL, ADL...;
- supports APIS and EBorders ;
- passenger tracking (PAXTracer);
- baggage reconciliation;
- flight documents;
- generating and sending operational messages PFS, LDM, FTL, ETL ...;
- Weight & Balance;
- calculate CG expressed in %MAC;
- generate load sheets.

Description

Airport Manager LDCS is a passenger check-in system for low-cost airlines. Chaque banque d'enregistrement peut gérer simultanément plusieurs vols. Each check-in workstation desk can simultaneously register several flights.

The programme is compatible with the use of multiple peripherals.

- MS : Magnetic Swipe Reader ;
- OC : LePassport Readers (Optical Character Reader) ;
- BC : Bar Code Reader;
- BP : Boarding Pass Printer (BPP) ;
- BT : Baggage Tag Printer (ATB);
- BG : Boarding Gate Reader (BGR) ;
- PR : Matrix printers for operational documents.

Weight & balance

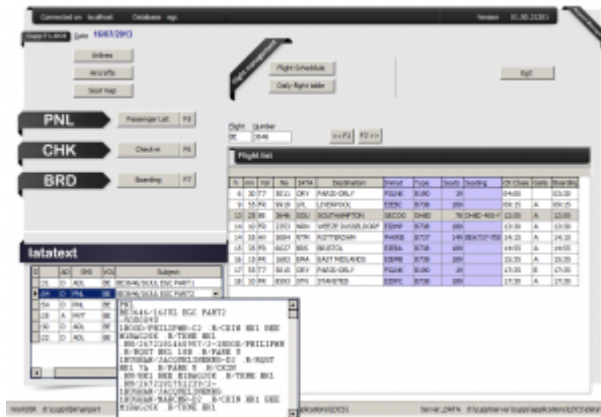

The L-DCS includes a «Weight & Balance» module, allowing the calculation of load and trim results. It calculates the load and trim and produces the plane loading expressed in %MAC. The results are sent in Excel spreadsheets, which produces a load sheet.

Use of 'Weight & Balance "module is subject to the certification requirements between Edge-airport and airlines.

LDCS - Main Screen

Flight list per day

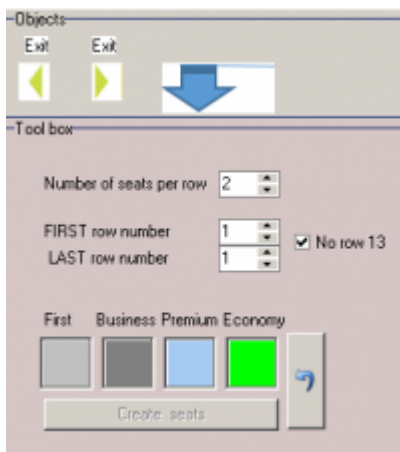

IATA Messages for each flight

Cabin Plans

The graphic tool facilitates the creation of a cabin plan:

- management of 2 flight decks (principal and superior (B747 or A380));
- multi-classing of passengers;
- positioning of emergency exits;
- blocking of seats;
- zone management

PNL - Integrating passenger lists

LDCS integrates the PNL and ADL messages and thus generates the passengers list. With this tool, it just takes couple minutes to prepare flights on LDCS.

The advantage of this functionality is the automatic recuperation of the following data:

1. sequence number for the passengers checked-in online (web check-in);
2. name of each passenger and reservation reference or number on E-ticket;
3. seat number;
4. count of men, women, children (-12 years) and babies;
5. specific information (prepaid baggage, wheelchairs ...);
6. connecting flights (allows bag tag printing to the final destination).

wireless barcode reader or an automatic gate.

The software can also be used without BGR. Just enter the sequence number of each boarding pass to board a passenger.

The screenshot shows the 'Airport Manager LDCS Boarding version 213.D1a' interface. At the top, there are various control buttons like 'F3 Sequence', 'F5', 'F7 PIL Print Manifest', 'F8 Flight Closure', and 'F10 Pax list'. A flight detail box shows 'BE 3646' with a time of '13:25' and destination 'SOU SOUTHAMPTON'. The main area is divided into a 'Boarding' section and a 'Debug' section. The 'Boarding' section displays a large green '2' and the name 'COCHRANE/FREYAMISS' with 'OK' below it. Below this are three 'Boarding Gate Reader' boxes. The 'Debug' section shows a table with columns for 'Seq', 'Nom passager', 'Nat', 'Class', 'Seat', 'Dest', 'Bag(s)', 'Kg', and 'Pax tracer'. The table lists several passengers, with the last two rows highlighted in red: '1 BLOOD/FIONAMRS' and '2 COCHRANE/FREYAMISS'. The bottom of the interface shows a status bar with 'd:\cupopt\bin\airport'.

Loadsheet

For companies certified to the "Weight & Balance" system, it is possible to generate loadsheet in Excel files.
