Edge Airport France

IATATEXT

Description technique

Le logiciel « IATATEXT » permet d’envoyer et de recevoir des messages opérationnels de type-B. Il est indispensable au fonctionnement du **L-DCS** afin de recevoir sur une adresse du type **xxxAMXH** les messages PNL et ADL.

A la clôture d’un vol par le **L-DCS**, c’est IATATEXT qui se charge d’envoyer les messages PFS, LDM, PRL, PTM, ETL, etc.

L’interface IATATEXT permet aussi d’envoyer manuellement tous les autres messages opérationnels.

Point fort : IATATEXT gère parfaitement la double-signature afin que les messages émis pour le compte des compagnies aériennes ne soient pas facturés à l’aéroport mais aux compagnies.

The screenshot shows the IATATEXT software interface. The main window displays flight information for a DEPART flight on 15/06/2026 at 10:00. The flight is operated by FR (AF44) with registration FGGR and aircraft Y189. The origin is LONDRES (STANSTED). The interface includes fields for date, time, flight number, aircraft, and cabin class. It also shows passenger and cargo statistics.
